

## Global Objectives

At the conclusion of this activity, explain what the physician learner will change in terms of competence, performance, or patient outcomes. These are your objectives and should focus on what the learners will be able to do as a result of this CME training. Use action words like those shown in the chart at bottom of page. Do NOT use "To understand..." or "To know..."

Knowledge: How will this activity improve knowledge?

Competence: How will this activity improve the learner's competence (ability to apply the knowledge)?

Performance: How will this activity improve the learner's performance (their ability to incorporate the knowledge and competence into their practice)?

Patient Outcomes: What is the expected outcome for the learner's patients with the improved knowledge, competence and performance of the learner as a result of this educational activity?
